## Bush vetoes troop withdrawal measure

WASHINGTON, D.C. (AP) — President George W. Bush on Tuesday vetoed a measure that would have required the withdrawal of U.S. troops from Iraq by the end of 2008. The measure, known as the Iraq War Resolution, was passed by a narrow margin in the House of Representatives. ### Experts see rice as culprit in global warming

WASHINGTON, D.C. (AP) — A new study by a team of scientists from the University of California, Berkeley, suggests that rice production is a major contributor to global warming. The study found that the production of rice releases large amounts of methane, a potent greenhouse gas, into the atmosphere. The researchers argue that reducing rice production or finding ways to reduce methane emissions from rice fields could help mitigate global warming. The study is one of the first to focus specifically on the impact of rice production on the climate.

## Trump eyes partnership with BCDA

Bidding requirement seen as snag to deal

By [Name]

WASHINGTON, D.C. — President Donald Trump's interest in a potential partnership with the Bureau of Civil Defense and Arms (BCDA) has been met with a significant hurdle. A bidding requirement for the deal is seen as a major snag, according to sources familiar with the matter. The deal, which would involve the sale of military equipment to the Philippines, has been a topic of discussion for some time. However, the bidding process, which is a standard procedure for such deals, is now the primary obstacle. Sources say that the bidding process is expected to take several months to complete. In the meantime, the Trump administration is working to resolve the issue and move the deal forward.

1. The first step in the process is to identify the problem or issue that needs to be addressed. This involves gathering information and understanding the context of the problem.

1. The first of these is the fact that the majority of the population of the United States is now living in urban areas. This is a result of the process of urbanization, which has been going on since the beginning of the 20th century. The process of urbanization is the movement of people from rural areas to urban areas. This is a result of the fact that urban areas offer more opportunities for employment and education. The process of urbanization has led to the growth of large cities and the decline of small towns. This has led to a concentration of population in a few large urban areas.
